

My Ocean Science Journal

Grades 6 - 8

Weekly Writing Prompt #1

Ocean Literacy Principle #1

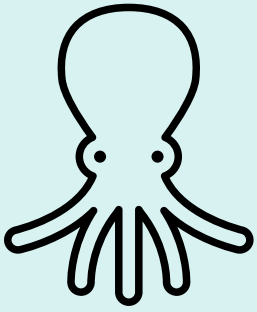

The Earth has one big ocean with many features.

Science Facts

Throughout the ocean, there is one interconnected circulation system powered by wind, tides, the force of the Earth's rotation (Coriolis effect), the Sun, and water density differences. The shape of ocean basins and adjacent land masses influence the path of circulation. This "global ocean conveyor belt" moves water throughout all of the ocean's basins, transporting energy (heat), matter, and organisms around the ocean. Changes in ocean circulation have a large impact on the climate and cause changes in ecosystems.

Weekly Writing Prompt #1

Try This

Imagine you are a drop of water moving through the ocean. Can you tell the story of your journey around the planet and describe some of the things you might see along the way?
